

NetBox

Overview

The browser-based NetBox™ access control and event monitoring system supports up to 32 portals. Features such as person record and cardholder management, event and alarm monitoring, threat level escalation and reporting are accessible from any web browser. There is no software to install.

The solid-state NetBox appliance is fast and reliable. The system works with existing infrastructure and peripheral devices, making it easy to deploy. Flexible and scalable, the NetBox system supports up to seven LenelS2 application blades and up to 32 portals. In addition, it tightly integrates with LenelS2 VRx™ and NetVR™ video management systems, providing unified system management and administration. Integration with third-party video management systems is also supported.

The NetBox system serves a range of applications from small businesses to field offices of large enterprises. As organizations grow, migration to a NetBox Extreme system is seamless. Large, distributed organizations can manage multiple NetBox controllers with a NetBox Global server, allowing for virtually unlimited scalability.

The LenelS2 Magic Monitor® client provides a unified access control and video surveillance experience.
